

RECYCLING RIGHT DOESN'T HAVE TO TAKE UP TOO MUCH SPACE

Think you don't have enough room in your apartment to recycle, or that recycling requires adding another big trash can? Think again! Recycling right in your apartment is as easy as adding a cardboard box, reusable bag, or small bin to collect recyclables.

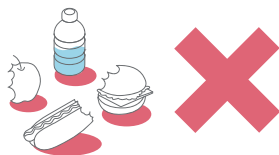

Check out Waste Management's YouTube channel here at [**youtube.com**](https://www.youtube.com) for more ideas on how to set up recycling in

your apartment, and visit [**wm.com/recycleright**](https://www.wm.com/recycleright) to download and print free decals to customize your bins.

And don't forget - some recycling actions make a bigger impact than others. So please remember these three simple rules the next time you recycle:

Recycle clean bottles, cans, paper, and cardboard.

Keep food and liquid out of your recycling.

No loose plastic bags and no bagged recyclables.
